

PARTICULARS:

Japanese Utility Model Laid-Open Publication No. 55-113082

Japanese Utility Model Application No. 54-011592

Date of Application: February 2, 1979

Inventor: Chikayuki Satomi

Applicant: Tanseisha Co., Ltd.

Title of the Invention: SMOKE APPARATUS

What is claimed is:

A smoke apparatus comprising a case containing a smoked material, a gas supply apparatus supplying a smoke gas into said case, and a gas adsorption apparatus adsorbing the smoke gas within the case, wherein said case is formed by a non-breathable sheet, said case is provided with an entrance door for the smoked material having a fastener portion formed as an internal and external multiple structure in a whole periphery, a pair of two pairs or more non-breathable shielding sheets are interposed in all the region between the inner and outer fastener portions in such a manner that one side ends are connected to the case forming sheet and the other side end are wrapped with each other, and an airtight seal is formed by enwinding the wrapped portion of the shielding sheet.
